

ACISOFT

ACID NEUTRALIZER AND SOFTNER FOR INDUSTRIAL WASHING MACHINES

GENERAL DESCRIPTION

ACISOFT is a concentrated softener with organic acids to neutralize the residual alkalinity, to solubilize calcium salts and to give to the linen a “soft hand” and to make ironing easy. Use for waters with alkalinity over 400 mg/l (CaCO₃) and hardness over 15°F.

It removes Chlorine or Peroxide based bleaches.

DIRECTIONS FOR USE

The product is used with automatic dosing systems. Recommended dosage: 8-10 g/kg of dry linen in the final rinsing cycle for waters with hardness of 15-25° F and alkalinity of 400 mg/l. For high hardness and alkalinity of the tap water, use 5 g/kg of dry linen for every 10° F more of hardness or every 100 mg/l more of alkalinity. Use QUATISOFT for waters with low hardness, (under 15° F) or with low alkalinity under 200 mg/l or when LAVIPER is used in the rising cycle.

TECHNICAL DATA

Appearance	Yellow liquid
pH	1.3 ± 0.3
Density	1.035 g/ml
Active contents	18%

Chemical composition – Reg. (EC) 648/2004

- Cationic surfactants conc. 5-15%
- Non ionic surfactants conc. < 5%

The product contains surfactants with primary biodegradability at least 90% and ultimate aerobic biodegradation complying with Reg. (EC) No. 648/2004

WARNINGS

Do not mix with other detergents or bleaches. Do not use for microfiber clothes.

Labelling

Warning

Causes serious eye irritation. Causes skin irritation.
Read carefully the safety data sheet before use
