

CENTRO

MAINTENANCE PRODUCT FOR MARBLE AND TERRAZZO FLOORS

GENERAL DESCRIPTION

CENTRO is a solution of components for the cleaning and polishing of marble and terrazzo floors with a scrubber dryer.

CENTRO cleans and polishes the floors in one operation. The floors become more resistant to traffic marks and to dirt pick up. The product is particularly suitable for large surfaces like shopping centres, supermarkets, airports, halls, etc. It can be used with the Bonny System.

DIRECTION FOR USE

Dilute the product at 3-5% (300-500 g in 10 liter of water) in a scrubber-dryer machine with the appropriate diamond polishing pads of the BONNY system. Use the Diamond impregnated pads (DIP). Start with DIP n°2 and wash the floor for 7-10 days, then use the DIP n°3 for other 7-10 days. The degree of gloss increases with the number of steps. After 15-20 days a high level of gloss is achieved.

TECHNICAL DATA

Appearance	White liquid
pH 5%	2.5
Density	1.038 g/ml
Active contents	12%

WARNINGS

Labelling

Warning

Causes serious eye irritation.

Read carefully the safety data sheet before use.
