

# COUNTRY

## WATER BASED WOOD SEALER

### GENERAL DESCRIPTION

**COUNTRY** is a water-based emulsion of acrylic and urethanic self- crosslinking polymers formulated as a wood floors sealer. The product is odourless, fast drying and very easy to apply. The **COUNTRY** film is glossy and resistant to scuffs and traffic marks. It shows good resistance to stains and water absorption.

**COUNTRY** can be also used for woodworks, cabinets and tables.

### DIRECTION FOR USE

For dirty or waxed floors clean with concentrated DEKA P or NEOKLIN using a floor machine equipped with an aerated black pad (Type 66). Let work and rinse with hot water, vacuuming at the same time the residues avoiding to wet the floor too much. When the floor is dry sand with a rotary machine equipped with sand paper pad (grain 40-80-150).

Apply the first coat of **COUNTRY** with a floor polish applicator, let dry and lightly sand with fine sandpaper or a special sanding disc like Sandscreen 150.

Vacuum off the dust, sweep with a dump mop or a gauze, and apply a second coat. Sand again if required and apply a final coat of **COUNTRY**.

### TECHNICAL DATA

Appearance	white liquid
pH	9.0 ± 0.2
Density	1.032 g/ml
Active contents	32%
Polymers and resins percentage	26%

#### Chemical composition – Reg. (EC) 648/2004

Perfumes

### WARNINGS

Keep from freezing.

#### Labelling

#### Warning

May cause an allergic skin reaction.  
Read carefully the safety data sheet before use.
