

COUNTRY OPACO

WATER BASED WOOD SEALER-MAT

GENERAL DESCRIPTION

COUNTRY OPACO is a water-based emulsion of acrylic and urethanic polymers formulated as a wood floors sealer. The product is odourless, fast drying and very easy to apply. **COUNTRY OPACO** leaves a mat natural looking film resistant to scuffs and traffic marks. It shows good resistance to stains and water absorption.

COUNTRY OPACO can be also used for woodworks, cabinets and tables.

DIRECTION FOR USE

For dirty or waxed floors clean with concentrated DEKA P, NEOKLIN or ECOKLIN using a floor machine equipped with an aerated black pad (Type 66). Let work and rinse with hot water, vacuuming at the same time the residues avoiding to leave the floor wet. When the floor is dry sand with a rotary machine equipped with sandpaper pad (grain 40-80-150). Apply the first coat of **COUNTRY OPACO** with a floor polish applicator, let dry and lightly sand with fine sandpaper or a special sanding disc like Sandscreen 150. Vacuum off the dust, sweep with a dump mop or a gauze, and apply a second coat.

Sand again if required and apply a final coat of **COUNTRY OPACO**.

TECHNICAL DATA

Appearance	mat milky white liquid
pH	8.4 ± 0.2
Density	1.045 g/ml
Active contents	33%

Chemical composition – Reg. (EC) 648/2004

Perfumes

WARNINGS

Keep from freezing.

Labelling

Warning

May cause an allergic skin reaction. Harmful to aquatic life with long lasting effects.
Read carefully the safety data sheet before use.
