

DEFOS VERDE

DESCALER FOR DISHWASHERS, LAUNDRY MACHINES AND OTHER EQUIPMENTS

GENERAL DESCRIPTION

DEFOS VERDE is a descaler based on phosphoric acid and dispersing agents totally without foam for washing machines, dishwashers, pot washers, pan washers and other equipment with limescale deposits. Contains corrosion inhibitor.

The product solubilizes and removes the limescale present in particular in the washing arms, allowing a good functioning and a longer life of the coils.

Product recommended in KEMIKA HACCP plans.

DIRECTIONS FOR USE

For dishwashing machines: prepare a solution at 20% based on the volume of the washing tank. Leave it on for half an hour, carrying out various washing cycles with the solution in cold water and then rinse several times with warm water.

For laundry machines: put 100 g of **DEFOS VERDE** per liter of water into the empty machine, throughout the dosing pump and perform a wash cycle at 30° C.

If the inlet liters data is not available, check the water filling level in the cylinder using the specific table available in the HORECA course.

For hospital bedpan washing machines: prepare a 10% solution and start the desired cycle. At the end of use, empty the tank and rinse well with running water.

Increase the concentration for heavily scaled surfaces.

For pots, boilers and other equipment: prepare the 50% solution, fill the item and leave to act for 2 hours and rinse.

TECHNICAL DATA

Appearance	green liquid
pH	1.5 ± 0.2
pH 3%	1.8 ± 0.2
Density	1.140 g/ml
Active contents	24%

WARNING

Labelling

Warning

Causes serious eye irritation. Causes skin irritation.

Product subject to ADR Norms: **UN 1805 Class 8 PG III.**

Read carefully the safety data sheet before use.
