NICK

LIQUID ABRASIVE CLEANER FOR SINKS AND METAL SURFACES

GENERAL DESCRIPTION

NICK is a combination of micronized calcium carbonate and surfactants for a thorough cleaning action.

NICK is used to clean sinks, bathrooms, pots and pans etc. and to remove dirt, oxidations and scales from metal surfaces like inox, copper, brass, bronze etc.

NICK can also be used to remove difficult dirt from microporous gres floors.

Recommended by Kemika for HACCP plans.

DIRECTIONS FOR USE

Pour **NICK** in small amount on a wet sponge or cloth and rub the surfaces. Rinse with water. For microporous floors use the product with a floor machine equipped with a red or cream pad. Apply the product and work with the machine. Rinse with water and vacuum off.

TECHNICAL DATA

Appearance	White viscous liquid
рН	10.5 ± 0.2
Density	1.368 g/ml
Active contents	49%
Viscosity	2200-2500 cps

Chemical composition – Reg. (EC) n. 648/2004

Warning

- Anionic surfactants	: conc. < 5%
- Non-ionic surfactants	: conc. < 5%
- Soap	: conc. < 5%

perfumes

The product contains surfactants with primary biodegradability at least 90% and ultimate aerobic biodegradation complying with Reg. (EC) No. 648/2004

WARNINGS

Labelling

Causes serious eye irritation. Read carefully the safety data sheet before use.
