

# PULIAKA GEL

## VISCOUS STRONG ALKALINE DETERGENT FOR THE REMOVAL OF THE BLACK CRUST FROM FACADES

### GENERAL DESCRIPTION

**PULIALKA GEL** is a strong alkaline detergent in gel formulated for the cleaning of facades soiled with smog and soot (black crust). To be used on marble, travertine, concrete, bricks, or natural stones.

The viscosity of the product make it suitable for vertical and rough surfaces.

**PULIALKA GEL** sticks to the surface allowing the alkaline salts to work.

### USE CONDITIONS

Apply with a brush on a moistened surface, let work, then rub with a moist brush. Rinse with water acidulated with DEFOS at 5% and then with pure water in order to neutralize the alkaline residues and avoid the formation of white efflorescences caused by the carbonation of the sodium hydroxide of the **PULIALKA GEL**.

In case of very stubborn black crusts let the product work for 15 min – 60 min, covering, if possible, the treated areas with a polyethylene sheet to avoid the product to dry.

Use protective clothes and glasses during the application.

### TECHNICAL DATA

Aspect	viscous white liquid
pH	14
Specific weight	1.238 g/ml
Active contents	34%
Viscosity	1200-2000 cps

#### Chemical composition – Reg. (EC) n. 648/2004

- Non ionic surfactants conc. 5-15%

The product contains surfactants with primary biodegradability at least 90% and ultimate aerobic biodegradation complying with Reg. (EC) No. 648/2004

### WARNINGS

Carefully cover the aluminium fixtures that can be damaged by **PULIALKA GEL** drippings.

#### Labelling

#### Danger

Causes severe skin burns and eye damage.

Product subject to ADR Norms: **UN 1719 Class 8 II.**

Read carefully the safety data sheet before use
