

# PULIALKA

## STRONG ALKALINE DETERGENT FOR EXTERIOR SURFACES AND TERRACOTTA FLOORS

### GENERAL DESCRIPTION

**PULIALKA** is a strong alkaline detergent to be used for the removal of smog and black scales from façades, monuments, old buildings, churches etc.

It can be used on marble, limy stones, brick or other natural stones.

It can be used to remove oxides or paint residues from terracotta floors.

### DIRECTIONS FOR USE

Apply the concentrated product with a brush or by spray on the surface previously damped. Spread evenly.

Let act for at least 15 minutes, then rinse with a high pressure water hose. For floors use a rotary machine.

In case of very porous surfaces, apply **PULIALKA** and then **PULIALKA GEL** for a longer contact time.

Rinse very well. The first rinsing should be done with an acid solution at 3/5% of DEFOS in order to neutralize the alkaline residues. An extra rinsing with plain water is always necessary.

In case of stubborn scales on silicate stone it could be necessary to clean with **PULIACID** instead of DEFOS.

Cover all the aluminum frames of the windows.

**PULIALKA** could damage those surfaces.

### TECHNICAL DATA

Appearance	Dark brown liquid
pH	14
pH 1%	12.6 ± 0.2
Density	1.261 g/ml
Active content	33%

#### Chemical composition - Reg. (CE) n. 648/2004

- Non-ionic surfactants conc. 5-15%

The product contains surfactants with a minimum primary biodegradability of 90% and aerobic biodegradation in compliance with Reg. (EC) 648/2004

For more information on cleaning facades or terracotta, consult the KEMIKA workbooks.

### WARNINGS

#### Labelling

#### Danger

Causes severe skin burns and eye damage.

The product is subject to ADR Norms: **UN 1719 Class 8 PG II**.

Read carefully the safety data sheet before use.
