

# SATINET

## POLISHING CLEANER FOR STAINLESS STEEL SURFACES

### GENERAL DESCRIPTION

**SATINET** is a cleaning-polishing emulsion for stainless steel polished or satin panels and window frames.

It removes rapidly fingerprints, dust and spots, leaving a clean and glossy surface.

It can be used particularly for the cleaning and the polishing of lift walls, kitchen equipment, office partition walls, and external stainless steel surfaces.

The product contains modified silicon oils, water-soluble solvents, deodorizing balsamic essence.

It can be used also in the nautical sector for the protection and the polishing of the stainless steel surfaces.

It is possible to use it also on painted wood or laminated cladding.

### DIRECTION FOR USE

Remove possible oxidation and rust from the surface using the product POLISH 28, before polishing with **SATINET**.

Spray directly on the surface and rub until it is dry with cloth (best with microfiber cloth EXTRAKLIN) or paper.

### TECHNICAL DATA

Appearance	White emulsion
pH	6.3 ± 0.2
Specific gravity	0.966 g/ml
Active content	28%

#### Chemical composition – Reg. (EC) n. 648/2004

- Non-ionic surfactants : conc. < 5%

Perfumes

The product contains surfactants with primary biodegradability at least 90% and ultimate aerobic biodegradation complying with Reg. (EC) No. 648/2004

### WARNINGS

#### Labelling

#### Warnings

Causes serious eye irritation.

Read carefully the safety data sheet before use.
